Project Title: The US Women's Gymnastics Team: Tokyo 2021

The US women's gymnastics team at the Tokyo Olympics won second at the games, with extremely talented gymnasts who dominated both team and individual events. I'd like to make this site multiple pages to highlight each member and their achievements, with the home page serving as a means of navigation and a general summary of the games. I would also like to have a page regarding Simone Biles pulling out of the team events, and explaining the reasoning behind the "twisties" and why it was necessary for her to pull out of the event.

Pages:

- Home page
 - This will be used as an anchor for the website, and include links to each page.
 - Will detail medals won as a team / individual total
- Members
 - This will be a landing page to find each member:
 - Simone Biles
 - Include skills named after her
 - Suni Lee
 - Jade Carey
 - Jordan Chiles
 - Grace McCallum
 - MyKayla Skinner
 - Each page will list individual achievements, college gymnastics school, where they are now
- Timeline of the games
- The "Twisties"
 - What happened with Simone Biles pulling out of the team finals
 - Explain that it's a spacial disconnect between mind and body that makes it extremely difficult to find where you are in space, and why it was dangerous for her to compete at such a high level
